

DRIVER SECURITY TRAINING

Whilst delivering a programmed repeat package of Driver Safety Training in North Africa for a long term client. The companies in country security manager identified a raised threat of street crime, carjacking and some cases of vehicles being followed had increased against Oil/Gas Industry personnel.

In particular, they were aware of direct threats against expat personnel and local personnel who worked for expat organisations with a risk of company and private vehicles being followed or targeted.

In response to the change of threat they were looking for a training solution that:

- Did not cause undue worry for staff.
- Did not cause an overt change in behaviour
- Did not require a change of security status for the company or its personnel
- Did raise awareness of Low level / opportunist street crime Car jacking
- Did raise drivers awareness of Vehicle surveillance and counter surveillance.

Provide simple techniques that would reduce risk.

- Did meet the security teams aims
- Was sanctioned by the corporate security in London and the USA.

By the end of that working day, HR4 provide an outline program for the Driver Security Awareness Training. The training program was sanctioned by the Corporate Security Team and in country Security Manager, with the training being given the go ahead.

The existing training program was replaced by the upgraded Security Awareness training which was delivered in French for the local personnel and English for the expats. content, format or language.

In the end, all those trained felt that they had a better understanding of how to protect themselves against low level street crime, carjacking and how to identify vehicle surveillance plus the local and corporate security had met their duty of care.

Whilst HR4 has fully developed training programs we always adjust our delivery to meet the requirements of the client, their area of operation and their personnel. We are adept at developing fully tailored training solutions to meet an individual clients requirements for
